Figure 1: The proposed framework for the FWA-EB model. The framework consists of three main components: the FWA model, the EB model, and the FWA-EB model. The FWA model is used to generate the FWA results, which are then used as input for the EB model. The EB model is used to generate the EB results, which are then used as input for the FWA-EB model. The FWA-EB model is used to generate the FWA-EB results, which are then used as input for the FWA model. The FWA model is used to generate the FWA results, which are then used as input for the EB model. The EB model is used to generate the EB results, which are then used as input for the FWA-EB model. The FWA-EB model is used to generate the FWA-EB results, which are then used as input for the FWA model.
